Congressman Steve King made the following statement after liberals in the House of Representatives passed H.R. 3962, the Pelosi health care bill.

“The American people reject the Pelosi plan. They do not support putting bureaucrats between patients and doctors, funding illegal aliens, raising taxes on small business owners and making millions of Americans reliant on the government for health services that should be personal and private. The American people must continue to rise up, speak out and kill this bill as it heads to the Senate.”
