

Congressman King Inspects the Damage to the Land and Infrastructure

Sioux City, IA - Congressman Steve King (R-IA) toured the flood damaged area along the Missouri River this afternoon during the district work period. The tour took place hours after Congressman King's aid in the effort to establish FEMA individual assistance was realized for the Fremont, Harrison, Mills, Monona, and Pottawattamie counties.

Photo taken by Congressman King while touring the flooded area of the Missouri River

"Seeing the scope of the damage firsthand makes me even more focused on the passage of H.R. 2942, my bill that would give us a high level of assurance that our families, farms and infrastructure will never again be devastated by another flood along the Missouri River."
