

Washington, DC- Congressman King released the following statement to mark the two year anniversary of ObamaCare becoming law:

"Today marks an event that will not be celebrated," said King. "The American people have rejected this government takeover of their healthcare. Americans know that ObamaCare infringes on our liberty and they know that the price tag is unsustainable. It seems that every day brings new revelations about its skyrocketing costs and its overstated coverage provisions. ObamaCare is one, massive empty promise. The next President must make 100% repeal his number one priority so that this second anniversary of ObamaCare's passage is the last."
